DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 8/15/05 have been fully considered but they are not persuasive as to claims 1-86 and 88.

For claims 1, 3-6, 19, 21-24 and 88, the applicant argues the cited references are silent on the desired effect of determining the optimum storage period, hence, it would not be obvious for the person of ordinary skill in the art to combine Yamashita, Roberts and Morris (See applicant's REMARKS page 18, 6-12).

The examiner disagrees. In first, the claims 1 and 19 never discloses the steps of imaging a first object on trial is for **determining the optimum storage period.**

In second, the Morris reference (U.S. Patent 6,665,010) clearly shows imaging a first object on trial (calibration or premetering mode) is for determining the optimum storage period (the proper duration for integration interval, see Col. 2, lines 4-7 and Col. 4, lines 9-36). It is well known in the art the "storage period" as recited by the applicant that is also can be called integration time, charge accumulation time or exposure time for the image sensor. When each pixel sensor unit is reset, the pixel integration time starts as the charges start accumulating in the pixel sensor unit corresponding to the intensity of light that strikes the pixel sensor unit. When the pixel integration time is over, the pixel gate signal line is selected by the control unit and the image signal is outputted. The duration for the integration interval is same as the "storage period" as recited by the applicant. Therefore, it

would be obvious for the person of ordinary kill in the art to combine Yamashita, Roberts and MOrris (Please see page 4 of the last examiner Office Action mail on 5/13/05).

In third, the Beiley reference (U.S. Publication 2001/0007471) also discloses determining "a storage period" as recited in claims 3-6, 21-24 and 88 in accordance with a period form the time of said resetting to a time when the signal of the pixel saturate (See page 2, [0029] and page 6 of the last examiner Office Action mail on 5/13/05).

2. The claims 1-86 and 88 will be rejected as set Final in the previous Office Action mailed on 5/13/05.

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lin Ye whose telephone number is (571) 272-7372. The examiner can normally be reached on Mon-Fri 8:00AM-5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David L. Ometz can be reached on (571) 272-7593. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
